10. Ethical aspects: IRB approval is required for all studies involving human subjects or animals. Please provide the name of the approving entity and the approval number for research. For systematic reviews it is recommended that the protocol is registered for instance at PROSPERO (this can be filled in by IRB). Studies in Progress - Studies in progress at the time of submission must include a detailed plan for (statistical) analysis and preliminary findings. Final results must be available by the 2026 ISDH Symposium	YES / No (if NO please reject the abstract) if ethical approval (IRB) is given in a second stage then there is the poster option. In other words, if the reviewer feels it should have had IRB approval and it does not, then do not accept, sending it back to the submitter. If the submitter is able to send IRB approval back – the only remaining option would be the poster option.
